

# DAY - 1

Static Website:- where we code on our own to create something e.g portfolio website

Dynamic website:- e.g youtube

Html → structure

CSS → styling

Js → functionality

database → memory/storage e.g login id, password  
server  
SQL      NoSQL  
server side languages = Js/php/Vbscript/Rust/golang

Domain name = unique name

## With CODING

- \* lots of customization
- \* uniqueness
- \* fast/efficient
- \* less code
- high seo

## WITHOUT CODING

- very few customization
- not unique
- slow
- unnecessary code
- low seo

Tag's  
div, img, a, p, h1, input, style, script, span  
button, audio, video, canvas, frame
